Summary:

Flock Safety project manager Lindsey Oellerich follows up after a kickoff call with Prescott PD's Lt. Jason Small, attaching the reviewed presentation and linking a Deployment Plan while noting site plans and TCPs are being drafted for permit submittal. The attached kickoff deck outlines the installation phases, team roles, cost expectations, and onboarding/training process.

Subject: Re: Flock Kickoff (set up a time)

Lt. Small,

Thank you so much for taking the time to meet with us yesterday! I have attached the presentation we reviewed during our call, and have your Deployment Plan linked [HERE](#).

As discussed, we are still working on drafting the site plans and TCPs for permit submittal. Once we get the permit applications submitted, I will let you know!

Best,
Lindsey

Hey Lt. Small and Sgt. Parker,

I'm excited to connect you with Caity and Lindsey who will help you get everything up and running with Flock! They are your customer success manager and project manager respectively.

I know you are working on a letter from public works for location approval, when you get that, just shoot it over to Lindsey and I.

For next steps, we need to get a kickoff call set up with the team. Can you schedule that using this link?

Flock Safety Kick Off Meeting

Meet The Team

Lindsey Oellerich

Project Manager

Your **Project Manager** is your implementation guide. They will keep you updated with any installation progress or questions.

Caity Peak

Customer Success Manager

Your **Customer Success Manager** will be your strategic partner. They will help with account setup and training, and provide direction on how to best leverage your Flock Safety system. Once cameras are installed, your **Customer Success Manager** will help drive adoption of the software and provide you with insight on the success of the partnership.

Installation Expectations

PHASE 1- Deployment Planning

Review
Locations

Confirm camera locations with your Product Implementation Specialist

Flock: Your Sales representative will present several viable options for camera locations

Customer: Review Deployment Plan & approve camera locations

Please Note: If Public Works is required to move forward, please obtain approval.

Finalize
Locations

Prepare for finalized camera locations

Flock: Confirm Deployment Plan and signed agreement. Flock will move forward with next steps for locations that don't need permits (minimum 10 locations needed to move forward with partial installation)

Customer: Prepare the below items, as needed

- If permits are required, begin application process
- If cameras will be AC-powered, hire an electrician/street department

Phase 2- Installation

Step 1

Conduct On-site Survey & place flags:

Flock: Flock technician conducts site survey to (1) evaluate solar or power access, (2) check line of sight to the road, and (3) evaluate cellular service in the area. When the technician deems the locations suitable, s/he will place a white flag at each spot.

Please note: If the initially determined locations don't meet Flock standards, we will evaluate a new location, obtain customer approval, and redo a site survey. This may push timeline for installation.

Step 2

Call 811

Flock: Flock Safety will coordinate with Call 811 to mark each camera location for underground utilities within a 10-foot radius.

Please Note: Call811 is a government service, so turnaround times may vary and is outside of Flock control

Step 3

Schedule installation:

Flock: Flock will (1) ship any site specific materials that the technician does not have locally (2) schedule the installation date

Step 4

Install & Validate Cameras

Flock: After installation, your Customer Success Manager will confirm that cameras are capturing footage well and functioning properly. They will then give you full access to the system along with helpful training resources.

Ongoing-as needed

Finalize any Installation needs

Flock: While we typically complete installations within 4 weeks of finalizing locations, delays may occur due to external factors. In these instances, we will continue to work through this process until your cameras are fully installed and operational.

What's Covered

Page 8 What is covered by Flock	What is NOT covered by Flock	Special note
Flock Cameras & Online Platform	Traffic Control and any associated costs	
Mounting Poles	Electrician & ongoing electrical costs	
AC Power Kit <i>(as needed)</i>	Engineering Drawings	
Solar Panels <i>(as needed)</i>	Relocation Fees	<i>exc. changes during initial installation</i>
Site Surveys and Call 811 Scheduling	Contractor licensing fees	
Installation Labor Costs	Permit application processing fees	
Customer Support / Training	Specialist mounting equipment	<i>Including, but not limited to, *MASH poles or adapters</i>
Cellular Data Coverage	Bucket trucks	
Maintenance Fees <i>(review Fees Sheet for more details)</i>	Loss, theft, damage to Flock equipment	
Data storage for 30 days	Camera downtime due to power outage	<i>Only applicable for AC-powered cameras</i>

*MASH poles: Manual for Assessing Safety Hardware (MASH) presents uniform guidelines for crash testing permanent and temporary highway safety features and recommends evaluation criteria to assess test results

Phase 3- Onboarding

flock safety

FIRST CAMERAS INSTALLED

ONBOARDING TRAINING

- **User Section (first half)**
 - How to search
 - How to hotlist
 - Other features & best practices
- **System Administrator Section (second half)**
 - How to share/request sharing
 - Assigning permissions
 - Adding users
 - Auditing the system

QUARTERLY CHECK-INS

- How are things going?
- What features aren't being used that I can provide refresher training on?
- How is your user adoption?

Training Can Be...

Live (virtual via Zoom)

- or -

Recorded (training recordings)

Scheduling will occur during your installation project when your first cameras are set to be installed!

Summary:

Email exchange between Prescott IT Operations Manager Jared Haxton and Police Sergeant Mark Parker discussing whether Flock Safety LPR could integrate with or piggyback on the city's existing parking garage cameras, and describing the current failing Vigilant standalone LPR system.

From: "Jared Haxton" <jared.haxton@prescott-az.gov>
To: "Mark Parker" <mark.parker@prescott-az.gov>
Date: 4/17/2023 2:29:54 PM
Subject: Re: Parking Garage Cameras

Ok. Gotcha. Doesn't Avigilon just have an add on feature for LPR? Or is that the Vigilant that keeps failing? It was a while ago but Avigilon offers something as part of their system... just something to enable/add to existing cameras right?

Jared Haxton
IT Operations Manager
City of Prescott

From: Mark Parker <mark.parker@prescott-az.gov>
Sent: Monday, April 17, 2023 2:22 PM
To: Jared Haxton <jared.haxton@prescott-az.gov>
Subject: Re: Parking Garage Cameras

You are correct, the individual cameras we are placing throughout the city are going to be operated over Verizon. We have in the parking garage now is a standalone LPR run by Vigilant which has once again, gone down...very frustrating especially when you go to find the plate for an assault suspect and find that the system was not working. At this point, I'm just looking into what piggybacking on our current parking garage cameras for LPR capabilities would look like. This will also give us some insight into what it might look like to piggyback onto other camera systems.

From: Jared Haxton <jared.haxton@prescott-az.gov>
Sent: Monday, April 17, 2023 12:28 PM
To: Mark Parker <mark.parker@prescott-az.gov>
Subject: Re: Parking Garage Cameras

Hey Mark. I was under the impression that the Flock cameras integrated directly with Axon through Verizon... That was the appeal of going with them right? But to answer the questions at hand...

1. All of the cameras run to switches that feed directly into the DVR at the parking garage
2. The setup was done by Amerx/Avigilon. But yes, the cameras should get an IP address through DHCP from the recorder.

Curious about Flock not going through Verizon... Is it doing more than LPR?

Jared Haxton
IT Operations Manager
City of Prescott

From: Mark Parker <mark.parker@prescott-az.gov>
Sent: Monday, April 17, 2023 11:54 AM
To: Jared Haxton <jared.haxton@prescott-az.gov>
Subject: Parking Garage Cameras

Jared –

I'm talking with our License Plate Reader vendor (Flock Safety) about how they integrate with existing cameras, specifically with the parking garage cameras for the moment.

Can you answer a few questions for me?

1. The cameras all feed back to a server / DVR at the parking garage, correct?
2. Do the cameras have individual IP addresses assigned to them?

I may have more questions if this looks like a viable option.

Thank you!

Shelby,

- 03, 04, 10, 14, and 15 are **not** DOT locations; via an email between our transportation director and Flock Safety permitting manager Michael Franzen, these were cleared for install last month...Can we get them on the schedule, please?
- Please remind me what we are doing with camera 10 as I do not recall that one needing adjustment.
- The only cameras that are DOT locations should be 9 & 13; the last update we received from you on these two cameras was on July 5th *"This morning our Permitting Manager reached out directly to AZDOT and asked for a status update for these permits. I will let you know as soon as we hear back"*. It's been a few months and I was hopeful Michael has an update for us.
- Cameras 9 & 13 were cleared for temporary locations a long time ago and those locations were provided and cleared...what is the delay with these?

Thank you,

Mark S. Parker

Subject: Re: Project Updates

Good Morning Sgt. Parker,

Please see below -

- 05, 06, 07, 10, and 16 are on the schedule for relocations/adjustments/site surveys next week
- 03, 04, 10, 14, and 15 are in the DOT process - a couple of devices have been added to the DOT list due to your desired locations needing permits.
- When maintenance is scheduled for a device, there isn't typically an action item on your part. The technician will reach out if they need tree trimming or whatnot, but Flock handles maintenance needs internally so you don't have to. It looks like maintenance is scheduled for several of your devices next week.
- I apologize if someone was left off an email with a notification. Please make sure you are replying all when responding to emails so we can ensure no one is dropped off.

Please let me know if you have any additional questions.

Thank you!

Good Afternoon Sgt. Parker,

11/25/2025

I think it would be best to hop on a mapping call to go through what is left outstanding at this point. I will bring in Permitting and a Deployment Specialist to help confirm the path forward.

What are some days/times coming up that would work for you for a call?

Thank you!

On Fri, Dec 8, 2023 at 7:49 PM Mark Parker <mark.parker@prescott-az.gov> wrote:

I completed some testing today and based on this testing, I don't know if we should move all of these because of what may be sun glare on the camera lens causing the unshaded cameras to not work properly. For example, the camera at Miller Valley and Iron Springs was moved up on the signal arm but because the solar panel is in a different spot the sun is blasting that camera lens and I cannot get the system to alert on my patrol car (plate entered for alert testing). Do you have a sun shield that can be installed over the camera to remedy this problem?

Please use the 1st day to assess the sunlight issues, if the tech feels the camera can be moved and shaded, then removing on the first day is fine.

- Device 03 - SR89 @ Rosser St NB (camera faces north)
 - **YES, MOVE.**
- Device 04 - Gurley St @ Sheldon St WB (faces West, lots of afternoon sunlight)
 - **DO NOT MOVE, UNLESS YOU HAVE A SUN SHIELD. CURRENTLY THE SOLAR PANEL SHADES THE CAMERA.**
- Device 14 - Montezuma @ Sheldon S (
 - **DO NOT MOVE, UNLESS YOU HAVE A SUN SHIELD. CURRENTLY THE SOLAR PANEL SHADES THE CAMERA.**
- Device 15 - Sheldon @ Marina St EB

- **PROCEED WITH MOVE TO SHELDON / MARINA, BUT CONSIDER EAST SUNLIGHT WHEN INSTALLING.**
- Add Device 6 – Miller Valley / Whipple to this work order. If there is no sunshield option. Move the camera further back on the extension arm and use the solar panel as a sunshield.

Good Morning Sgt. Parker,

We currently have Devices 03, 04, 14, 15 scheduled on 12/19 and 12/20 -

- Device 03 - SR89 @ Rosser St NB
- Device 04 - Gurley St @ Sheldon St WB
- Device 14 - Montezuma @ Sheldon S
- Device 15 - Sheldon @ Marina St EB

Also, I touched base with Permitting and they are confident we are close to obtaining DOT permits for Devices #09 and #13. The resubmitted paperwork is showing "under review." I know you have mentioned temp locations before but Michael, my Permitting Manager, doesn't think they will be necessary since we are so close to DOT issuance. Does this work for you?

Thank you!

Good Morning Sgt. Parker,

I touched base with my Field Team about your upcoming installations. They suggested the below based on bucket truck availability -

"Would the customer be okay with us doing the removals on the 19th and then the reinstalls on the 20th with the bucket truck? We won't be able to do all removals and installs on the same day, so their cams will be down. if they're available on the 19th with the BT that'd be great too"

Would the above plan work for you?

Thank you!

Hi Shelby,

I just updated Sgt. Parker with the new install dates that you provided to me, so thank you for getting us that info. Also, are you and Michael able to provide an update on the DOT locations as far as a timeline? Michael-was this an instance where the DOT was making you re-do the forms because they have a new one? Lastly, if we still anticipate further delay, could we move forward with the two temp locations that were approved?

- Lt. Small and I both seem to get messages that that other one did not receive. Can you please correct this so the both of us receive the same messages? For example, I do not receive the messages regarding the ADOT permit process nor did I receive the message that one of our cameras was down and would be repaired.

Thank you,

Mark S. Parker

Good Afternoon Sgt. Parker,

I did not receive your message until after the meeting had started. Please feel free to call me at your earliest convenience to discuss what is outstanding and the path to project completion. I will follow up with the meeting attendees after my call with you to coordinate.

Thank you!

Good Afternoon Sgt. Parker,

I think it would be best to hop on a mapping call to go through what is left outstanding at this point. I will bring in Permitting and a Deployment Specialist to help confirm the path forward.

What are some days/times coming up that would work for you for a call?

Thank you!

On Fri, Dec 8, 2023 at 7:49 PM Mark Parker <mark.parker@prescott-az.gov> wrote:

I completed some testing today and based on this testing, I don't know if we should move all of these because of what may be sun glare on the camera lens causing the unshaded cameras to not work properly. For example, the camera at Miller Valley and Iron Springs was moved up on the signal arm but because the solar panel is in a different spot the sun is blasting that camera lens and I cannot get the system to alert on my patrol car (plate entered for alert testing). Do you have a sun shield that can be installed over the camera to remedy this problem?

Please use the 1st day to asses the sunlight issues, if the tech feels the camera can be moved and shaded, then removing on the first day is fine.

- Device 03 - SR89 @ Rosser St NB (camera faces north)
 - **YES, MOVE.**
- Device 04 - Gurley St @ Sheldon St WB (faces West, lots of afternoon sunlight)
 - **DO NOT MOVE, UNLESS YOU HAVE A SUN SHIELD. CURRENTLY THE SOLAR PANEL SHADES THE CAMERA.**
- Device 14 - Montezuma @ Sheldon S (
 - **DO NOT MOVE, UNLESS YOU HAVE A SUN SHIELD. CURRENTLY THE SOLAR PANEL SHADES THE CAMERA.**
- Device 15 - Sheldon @ Marina St EB
 - **PROCEED WITH MOVE TO SHELDON / MARINA, BUT CONSIDER EAST SUNLIGHT WHEN INSTALLING.**
- Add Device 6 – Miller Valley / Whipple to this work order. If there is no sunshield option. Move the camera further back on the extension arm and use the solar panel as a sunshield.

Subject: Re: Project Updates

Good Morning Sgt. Parker,

We currently have Devices 03, 04, 14, 15 scheduled on 12/19 and 12/20 -
11/25/2025

- Device 03 - SR89 @ Rosser St NB
- Device 04 - Gurley St @ Sheldon St WB
- Device 14 - Montezuma @ Sheldon S
- Device 15 - Sheldon @ Marina St EB

Also, I touched base with Permitting and they are confident we are close to obtaining DOT permits for Devices #09 and #13. The resubmitted paperwork is showing "under review." I know you have mentioned temp locations before but Michael, my Permitting Manager, doesn't think they will be necessary since we are so close to DOT issuance. Does this work for you?

Thank you!

Good Morning Sgt. Parker,

I touched base with my Field Team about your upcoming installations. They suggested the below based on bucket truck availability -

"Would the customer be okay with us doing the removals on the 19th and then the reinstalls on the 20th with the bucket truck? We won't be able to do all removals and installs on the same day, so their cams will be down. if they're available on the 19th with the BT that'd be great too"

Would the above plan work for you?

Thank you!

Hi Shelby,

I just updated Sgt. Parker with the new install dates that you provided to me, so thank you for getting us that info. Also, are you and Michael able to provide an update on the DOT locations as far as a timeline? Michael-was this an instance where the DOT was making you re-do the forms because they have a new one? Lastly, if we still anticipate further delay, could we move forward with the two temp locations that were approved?

Shelby,

- 03, 04, 10, 14, and 15 are **not** DOT locations; via an email between our transportation director and Flock Safety permitting manager Michael Franzen, these were cleared for install last month...Can we get them on the schedule, please?
- Please remind me what we are doing with camera 10 as I do not recall that one needing adjustment.
- The only cameras that are DOT locations should be 9 & 13; the last update we received from you on these two cameras was on July 5th *"This morning our Permitting Manager reached out directly to AZDOT and asked for a status update for these permits. I will let you know as soon as we hear back"*. It's been a few months and I was hopeful Michael has an update for us.
- Cameras 9 & 13 were cleared for temporary locations a long time ago and those locations were provided and cleared...what is the delay with these?

Thank you,

Mark S. Parker

Subject: Re: Project Updates

Good Morning Sgt. Parker,

Please see below -

- 05, 06, 07, 10, and 16 are on the schedule for relocations/adjustments /site surveys next week
- 03, 04, 10, 14, and 15 are in the DOT process - a couple of devices have been added to the DOT list due to your desired locations needing permits.
- When maintenance is scheduled for a device, there isn't typically an action item on your part. The technician will reach out if they need tree trimming or whatnot, but Flock handles maintenance needs internally so you don't have to. It looks like maintenance is scheduled for several of your devices next week.
- I apologize if someone was left off an email with a notification. Please make sure you are replying all when responding to emails so we can ensure no one is dropped off.

Please let me know if you have any additional questions.

Thank you!
